

KLIMALOGIC I ELECTRONIC CONTROL UNIT

PRODUCT BENEFITS:

- Automatic control of interior temperature
- Allows selection of manual or automatic control of the blower speed
- Display of ambient and interior temperature
- Fault indicator
- Reheat function (optional)
- Fresh air/recirculation air control (optional)
- Hour meter (optional)
- Temperature-controlled compressor lock-out (optional)
- CAN-bus capable (optional)

The electronic control unit Klimalogic I (new plastic housing) regulates all functions of the Eberspaecher Suetrak range of air conditioners. Entries are done via the robust, illuminated keypad. All settings, such as interior temperature, fresh air or blower speed can be selected on a well arranged LED display. The automatic safety function makes sure that the compressor will be switched off in case of certain incorrect operating conditions. Thanks to its compact size, the control unit Klimalogic I can be easily integrated in any dashboard. Variants are available for 12 VDC and 24 VDC vehicle power systems. The software can also be parameterized for individual customer requirements.
